Work Experience**Acornic Ventures***IT intern**October 2024-December 2024*

- Designed and implemented a digital **expense reimbursement system** using Python and Flask, streamlining workflows and replacing the outdated paper-based process.
- Developed an intuitive **form for reimbursement claims submission** and an **admin dashboard** for efficient claim review and management.
- Technologies: Python, HTML, CSS, SQLite, Flask, Pandas

Sheikh Khalifa Medical Center*Volunteer Trainee*

- Worked with enterprise systems and automation tools (Oracle Fusion, Power Apps, Power BI, Power Automate, SharePoint, ticketing platforms) to support system configuration, access control, and workflow automation in a production environment.
- Built hands-on experience in networking and infrastructure fundamentals, including IP addressing, VLANs, subnetting, firewalls, VDI/Citrix access, and troubleshooting workstations and enterprise devices while resolving real user issues.

Volunteer work

Volunteered at Mazenod college, Anuradhapura, Sri Lanka in 2024 July
